(54) ACTIVE MATRIX OLED FLAT PANE DISPLAY

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an active matrix OLED (organic light emitting diode) flat panel display improved to automatically correcting brightness and color rendering.

SOLUTION: This display is an active matrix OLED flat panel display 4 comprising a plurality of light emitting elements and a associated control circuit, programmable power source connected with the control circuit, sensors for detecting optical outputs of one or more light emitting elements for generating a feedback signal, and a display controller responding to the feedback signal for programming the programmable power source for correcting changes of the light outputs from the light emitting elements.
